Details

**GENERAL DESCRIPTION:**

ZG energy saving circulating fluidized bed boiler hot water boiler can be interior decoration, but also can open layout, could burn anthracite, bituminous, lignite and coal and other relatively low calorific value fuel, energy saving and environmental protection the effect is evidently, with wide load adjustment range.

**Performance advantages**

1. High combustion efficiency, energy saving evidently.
2. Energy saving circulating fluidized bed boiler has wide output adjustment range and fast regulation speed.
3. Clean burning, excellent environmental performance.
4. Easy to ignite, and could press the fire for a long time.
5. Compact structure, low maintenance.
